META BIKE

The most revolutionary Bike racing
NFT game on BLOCKCHAIN.

NFT stands for non-fungible token, which is a unit of data kept on a blockchain that certifies a digital asset as unique and hence unrepeatable.

While real digital ownership is still a relatively new notion, there is undoubtedly a case to be made for entirely transparent ownership potentially raising the value of an authentic, non-replicable digital artwork. But what if, in addition to owning NFT, you could do something profitable and enjoyable with it?

MetaBike will dominate the market in this area.

WHAT IS METABIKE?

MetaBike is a multiplayer virtual blockchain skill-based gaming platform with a decentralized rewards pool system for seamless racing.

MetaBike is the world's first decentralized blockchain-based bike race platform on both BSC and AVALANCHE chains, bringing together millions of bike race fans in a community where they can own, earn, discover and trade NFT Bikes and skills.

We offer seamless racing with a decentralized structure of earnings cheat free and 100% secure.

MetaBike combines two rapidly rising multibillion-dollar markets: video games and bike racing, which are both brought together by blockchain and NFT technology.

META BIKE

PROBLEMS

- Slow digitalization of the billion-dollar motorbike racing market.
- Lack of transparency, safety, and privacy.
- Slow and expensive transactions.
- Dull and predictable gameplay.
- Lack of uniqueness in video gaming, and motorbike racing markets.

SOLUTIONS

- MetaBike brings the latest technologies and implements them in a way that solves the main industry issues.
- Decentralized solutions guarantee transparency, fairness, privacy and safety
- Cheap transactions, and near-instant fund transfers.
- NFTs take ownership and uniqueness to the ultimate level.
- MetaBike is focused on growing and earning with the player base by providing a multitude of ways for players to earn actual profit.

GAMING MARKET

Out of the 8 billion worldwide population, **3.1 billion people play video games**. That is about **40%** **of the world population**. **A billion more than just five years ago.**

Number of active video gamers worldwide from 2015 to 2023 (in billions)

METABIKE CORE FEATURES

Decentralized rewards system: MetaBike is the first decentralized blockchain-based bike race platform that brings together millions of bike racing enthusiasts in a community where you can buy and own NFTs, join competition or PVP, you can also earn by renting NFTs.

Healthy reward pool: Gaming becomes more engaging and fun filled with incentives to drive actions hence a healthy reward pool is important. 2% of Buy/sell transactions on the MBR token will be added back to the reward pool.

The gameplay of Bike Racer is created to be seamless. The player can participate in a preferred way. The player can earn through:

I. PVP: Players can play against themselves by betting an amount of MBR Tokens, winner takes all

II. Participating in Organised Competition: Weekly Competition will be organized, 3 winners will be selected and winners will be displayed on the leaderboard every week.

III. Reflections from trade: 3% of tax generated from traders will be rewarded to every token holders according to their holdings.

THERE'S NEVER A ZERO.

META BIKE

HOW DOES IT WORK?

One of MetaBike core user experience philosophies is to provide players with diverse ways to easily and instantly earn Metabike tokens (MBR). All player earnings are paid out only in MetaBike tokens and is done in a decentralized manner. Not regulated by any supervisory body.

Bike owners can own NFTS and trade bikes as well as compete in races. There will be host races and competition against each other to attract participants, which allows for PVP.

META BIKE

NFT METABIKES

Every NFT bike has a set of unique characteristics:
Bikes can be bought in NFT marketplaces (in-game) with the native MBR token
Every NFT motorbike data is visible to the public. Users can inspect motor bike condition, check the bike quality and price before purchase

META BIKE

NFTS MARKETPLACE

- **Bikes:** There are different kinds of bikes which are made available for racers to buy on the marketplace with different prices attached based on quality of bike.

Customise

- **Custom features:** users can upgrade and personalize their motorbike including renaming their motorbike to their desired name.

- **Bike rentals:** own a rental shop, own up to 10 motor bikes to establish your in-game rental shop. Rent your bikes and earn passively.

Token holders and non-gamers can participate in the game play by engaging in leasing services to gamers. Prices are fixed by NFT owners.

META BIKE

RACENOMICS

The native game currency is MBR Token (Motorbikeracing) which is used for trades on the marketplace, all earnings are in the MBR Tokens.

MOTORBIKERACING TOKEN (MBR TOKEN)

The MotorBikeRacing Token is a Bep20 cryptographic token that can be traded on the Smart Chain blockchain. It is both a MotorBikeRacing platform currency and an independent store of value for players and investors.

Using MotorBikeRacing tokens (MBR Tokens) for in-game transactions allows us to lower costs on transaction fees, keeping them at the bare minimum promoting the utility of the MBR token.
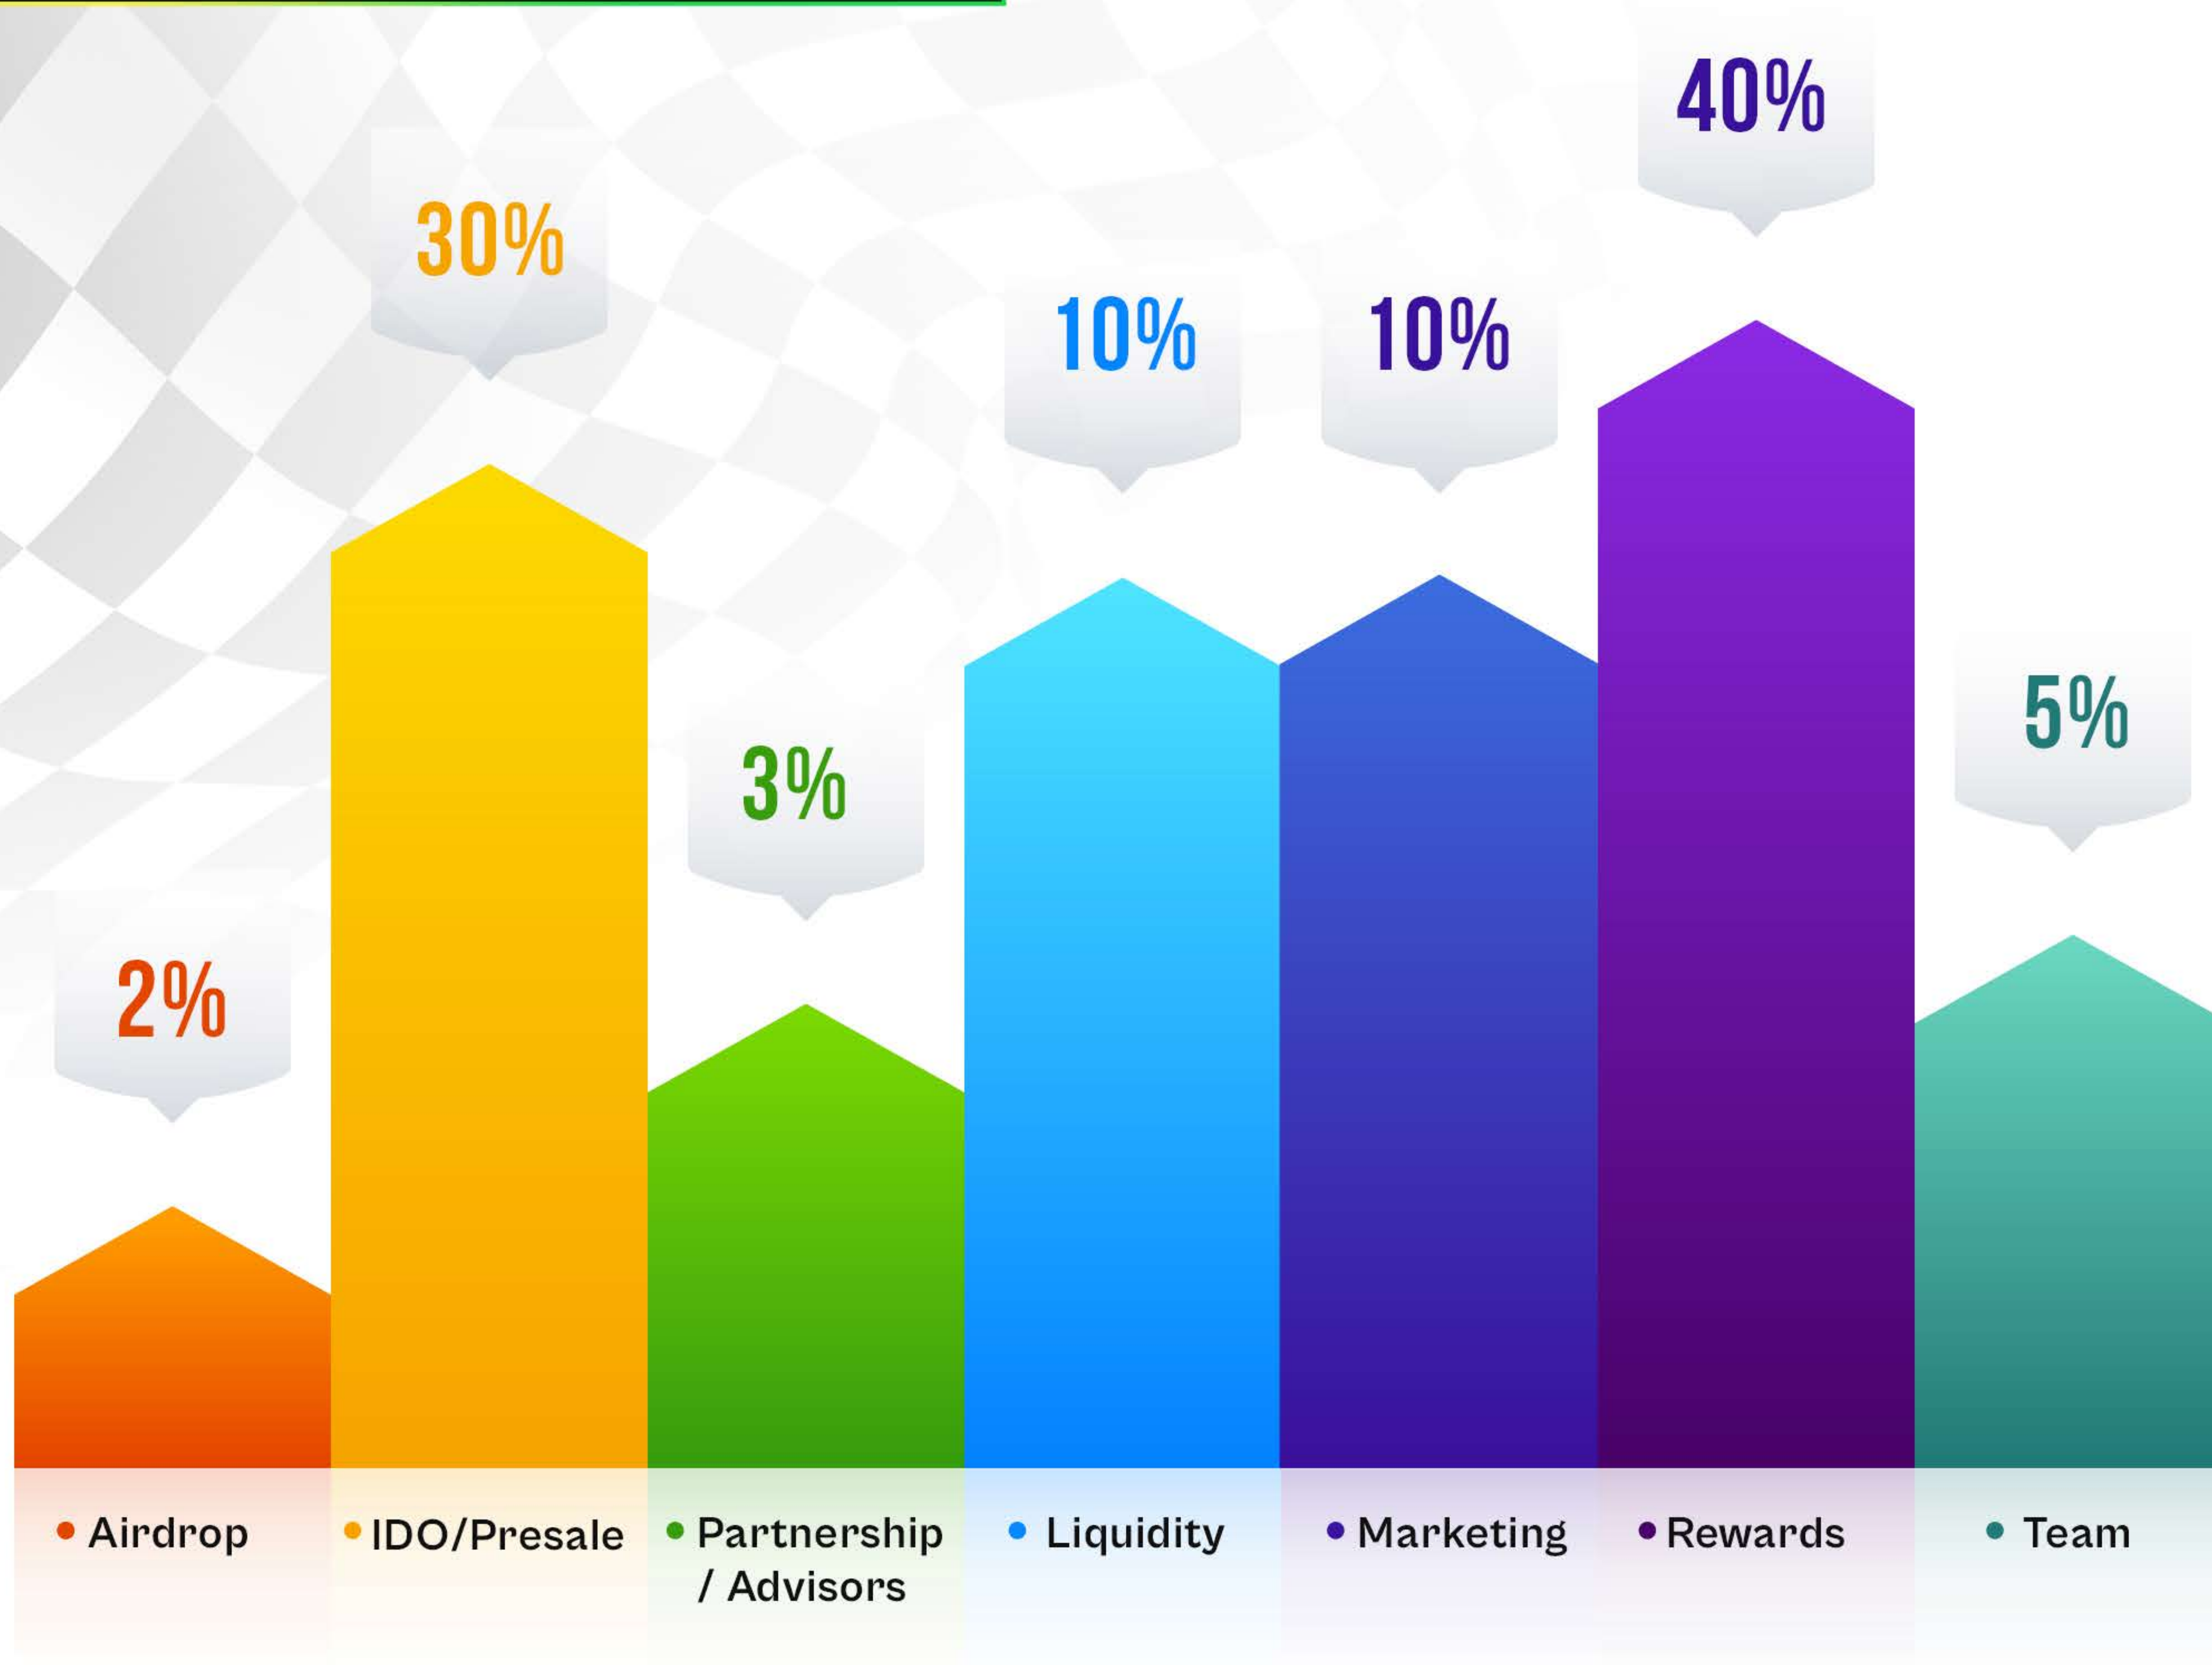

Buy and sell transactions will have a 8% tax
2% will be added to the reward pool, 3% reflections and 3% added to liquidity.

META BIKE

MOTORBIKERACING UTILITY

Motorbikeracing coin is a fuel value to the whole platform. all transactions will ultimately be executed using Motorbikeracing Coins. All races, winnings, bikes, and items traded are done in Motorbikeracing token.
All the in-game assets transactions are made in Motorbikeracing. This guarantees constant token volume and circulating supply.

META BIKE

Q4/'21

- Community Creation
- Whitepaper launch
- Website launch
- Game trailer release
- MotorBikeRacing token launch
- Listing on Pancakeswap
- Beta Version Released for testers, advisors
- Smart contracts and interaction setup
- Coingecko listing
- Coinmarketcap listing

Q3/'22

- NFT (smart contract) launch
- Leaderboard integration
- Wallet integration
- PVP Integration
- Commencement of Weekly Competitions

ROAD MAP

META BIKE

Q2/'22

- Alpha release
- CEX listings
- Avalanche integration
- Additional NFT MotorBikes Items launch
- 3rd party betting solution integration

Q1/'22

- MotorBikeRacing mobile app for iOS and Android
- API for MotorBikeracing streaming platforms
